

Double Dually Light Brackets 132-JKDLB1

Installation Instructions

Use a star socket to remove the stock windshield bolts.

Mount the Double Dually Light Bracket with the factory hardware onto the windshield post.

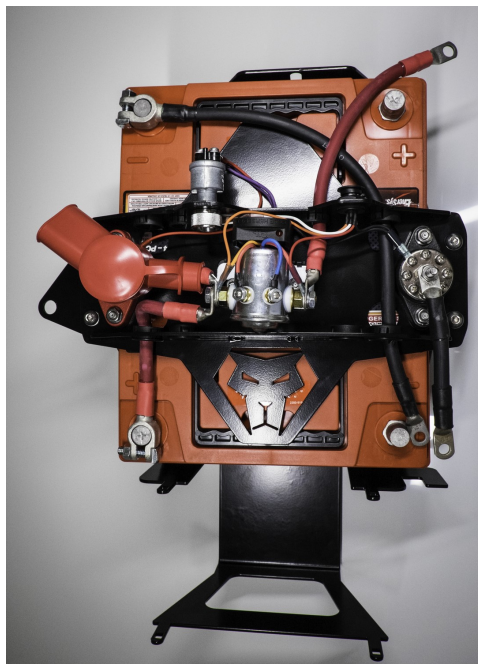

Install your lights onto the bracket and adjust the angle of each light to fit your needs.

If you have a 50" light over your windshield, you can stack our bracket on top of the other bracket, but you may need to get longer bolts from your local hardware store.

Don't forget to post a picture of your new lights on Facebook or Instagram and tag Genesis Offroad!
